

Cloud backup solutions

Securely backup your data to the cloud

The security and backup of data is a fundamental requirement for most businesses. Cloud Heroes' backup solution is cost-effective for businesses of any size and delivers an enterprise class service which is secure, reliable and affordable.

You can choose between a managed or self-managed service but, either way, your data will be secured across multiple UK data centres and supported by our experienced team of engineers.

Features

- **Initial full backup**
A complete backup of your data will be taken over the Internet or physically depending on data volumes.
- **Multiple restore points**
All our solutions come with a standard 10-day cycle, which can be increased inline with your requirements.
- **Archive points**
Keep individual snapshots of your data for as long as you need them.
- **Encrypted data**
All data is encrypted over-the-wire and when stored on our backup servers.
- **Support for MS Exchange, MS SQL & MySQL**
Restore individual mail and database items.
- **Multiple backup copies**
Data is kept in at least two geographically diverse data centres for added security and peace of mind.

Benefits

- **Reduced costs**
No need to buy expensive data backup software and/or hardware. Our backup solutions are run on simple monthly rental plans.
- **Peace of mind**
All backup processes are monitored to ensure they complete successfully, and all issues are identified and resolved by our support team.
- **Maximum flexibility**
We can deliver a service run with on-premise servers and cloud servers, so there is no need for additional costs if your technology model or requirements change.
- **Business continuity & disaster recovery**
The reassurance that, should your on-site server be damaged or stolen, we can restore your data quickly to the new equipment.
- **Full scalability**
Only pay for the data backup volume you need and easily add to your plan as your requirements change.

Our commitment to you

- Direct telephone and email access to our UK based support team.
- Our infrastructure is monitored and maintained on a 24-7-365 basis.
- Our network is designed to be resilient, highly available and self-healing.
- All our operations conform to ISO 9001 standards.
- All our data centres are UK based and conform to ISO 27001 standards with the option for environments that support PCI-DSS compliance.
