

High speed Internet

Scalable, flexible and secure Internet access

We offer a range of reliable Internet access services for email, website and e-commerce transactions, starting with traditional ADSL right through to ultra high speed fibre Ethernet. From micro businesses to international organisations, we have an Internet access service to fit your requirements and budget. We use our own IP network specifically designed to support UK businesses, which allows you to expand your service according to the demands of your business.

Whether you require simple, affordable Internet access or high-speed, multiple fibre Ethernet lines for added resiliency, our experienced team of engineers will design, implement and support a solution that meets your exact requirements. We can run the project on your behalf, or work alongside your internal/outsourced IT team to ensure your service is fast, reliable and most importantly secure.

Options available

- **Broadband**
From ADSL to FTTC fibre-broadband with up to 80 Mbps download speeds.
- **Bonded broadband**
For low-cost fast Internet access.
- **EFM (Ethernet First Mile)**
High speed, affordable Ethernet over copper.
- **Fibre Ethernet**
From 10 Mbps to 10 Gbps, low-latency and high capacity networking.

Features & Benefits

- **Maximum flexibility**
We offer a wide range of solutions to fit your exact requirements.
- **Full scalability**
Your secure Internet access can grow with your business and its demands.
- **MPLS private cloud options**
Choose between managed and unmanaged.
- **Customise your solution**
Managed router and firewall options are available.
- **Added peace of mind**
Enjoy our 99.99% financially backed Service Level Guarantee (SLA) on all Ethernet products.

Our commitment to you

- Direct telephone and email access to our UK based support team.
- Our infrastructure is monitored and maintained on a 24-7-365 basis.
- Our network is designed to be resilient, highly available and self-healing.
- All our operations conform to ISO 9001 standards.
- All our data centres are UK based and conform to ISO 27001 standards with the option for environments that support PCI-DSS compliance.
