Wireless networks

Business grade, secure wireless solutions

CLOUD HEROES

Providing secure, reliable and fast Wi-Fi access for your guests has become an essential service in the hospitality and business accommodation markets. Offering free Wi-Fi access, which requires a Facebook Like or captures contact details for future marketing activities, is just one way our Wi-Fi service can enhance your business and deliver best value return from your investment.

Our wireless networks are especially suited in business-to-business environments for visitor access and shared Internet in a multi-user office, where each business can benefit from its own secure network segment. With our remote monitoring service, your bandwidth can be adjusted to cater for peaks in usage and to identify potential bottlenecks and issues before they happen. Our solutions are flexible and can meet most budgets and requirements.

Options available

- **Wi-Fi marketing**
  Grow your social presence by attracting social Likes and capturing contact details for online marketing activities.
- **Wi-Fi analytics**
  Understand your true requirements and usage profiles for more efficient working.
- **Wi-Fi security**
  Protect your business and its guests online.
- **Wi-Fi legal**
  Full compliance with current UK legislative requirements for public Wi-Fi access.
- **Wi-Fi content filtering**
  Protect your business and its guests from unwanted, explicit content.

Features & Benefits

- **Maximum flexibility**
  We offer a wide range of solutions to fit your exact requirements.
- **Full scalability**
  Your secure wireless network can grow with your business and its demands.
- **Added connectivity**
  Telephone lines and broadband services can be included, as well as network switches if required.
- **A complete solution**
  Wi-Fi router(s) and access points supplied.
- **Easy administration**
  All solutions include management and user software so you're in full control.

Our commitment to you

- **Direct telephone and email access to our UK based support team.**
- **Our infrastructure is monitored and maintained on a 24-7-365 basis.**
- **Our network is designed to be resilient, highly available and self-healing.**
- **All our operations conform to ISO 9001 standards.**
- **All our data centres are UK based and conform to ISO 27001 standards with the option for environments that support PCI-DSS compliance.**
