

# SSL Certificates

## Making the web more secure

As part of Cloud Heroes' updated cyber security policy, we are offering free SSL certificates to all new and existing hosting customers inline with Google's new commitment to favour secure https sites over non-secure http sites in search, to improve your business' cyber security and SEO performance.

Websites with a valid SSL certificate will display a padlock in the address bar, signifying to visitors that all information sent from the site will be encrypted and is safe from eavesdropping, attacks and modification. The SSL certificate will instil trust in your customers and keep their data safe, while at the same time boosting your business' SEO performance and future-proofing your site. While the free certificates will secure your website's communications, we also offer the highest class of SSL, the Extended Validation (EV) SSL certificate, which activates the green address bar and includes a \$1M warranty and liability protection insurance – perfect for e-commerce and large sites in need of an extra layer of security.

### Options available

- **Free SSL certificate**  
Full encryption of all website communications through an established secure connection, marked by a padlock in the address bar. The perfect entry-level solution for websites that don't deal with large amounts of user info.
- **Basic SSL certificate**  
Full encryption of communications, including domain validation and a \$10,000 warranty and liability protection insurance, marked by a padlock in the address bar.
- **Extended Verification (EV) SSL certificate**  
The strongest encryption on the market, marked by a highly visible green address bar. The EV SSL certificate requires full business validation, which can take up to 10 business days to issue, and includes a full \$1M warranty and liability protection insurance.

*Other options are available upon request to suit your exact requirements. Our team will help you find the perfect match.*

### Features & Benefits

- **Secure browsing and shopping**  
All data sent from your site or e-commerce platform is encrypted and safe from eavesdropping, man-in-the-middle attacks and data modification.
- **Increased trust**  
An SSL certificate will demonstrate your commitment to cyber security to your customers.
- **Unlimited protection and reissues**  
All our SSL certificates protect an unlimited amount of servers and come with unlimited free reissues.
- **Visible certificates**  
All valid certificates will display a visible padlock in the address bar.
- **SEO boost**  
Google gives secure sites a ranking boost and, whenever possible, will automatically direct visitors to the secure equivalents of your http pages.
- **Protect against browser changes**  
Future versions of major browsers may follow Google's lead and start marking sites without an SSL certificate as insecure.

### Our commitment to you

- Direct telephone and email access to our UK based support team.
- Our infrastructure is monitored and maintained on a 24-7-365 basis.
- Our network is designed to be resilient, highly available and self-healing.
- All our operations conform to ISO 9001 standards.
- All our data centres are UK based and conform to ISO 27001 standards with the option for environments that support PCI-DSS compliance.
