

Client case study

H.J. Knee

Date added:	14 October 2015
Categories:	Connectivity, Hosted Exchange, Hosting, Virtual Desktop Infrastructure, VoIP
Description:	

An established family business, H. J. Knee Ltd has been growing in size and strength since 1879 and has interests in retail, engineering and property, across the South West. Known locally as “Knees”, their most recent expansion has been the opening of their flagship retail store, Knees Home & Electrical, located in The Spitfire Retail Park in Trowbridge.

With such a legacy, Knees has come a long way since its foundations and the most recent generation of the Knee family has embraced modern technology for efficient and secure cross-site working.

Cloud Heroes were brought in to provide a complete solution including high-speed broadband and connectivity, web hosting and hosted desktop. In addition, our engineers provide elements of traditional on-site IT support services where they work on improving infrastructure and provide comprehensive Wi-Fi install and support services throughout the different company divisions. We ensure all systems are online and operating to Knees’ high standards so that they can continue to provide their goods and services to their customers without any issues.
