

Disaster recovery

Protect your business

Losing access to systems, hardware or data can bring a business to its knees. That's why disaster recovery plans need to be in place, should the worst happen, to ensure business continuity within a matter of hours. Our disaster recovery solutions will get you back up and running when you need it the most, including recovery of your major IT systems, without the expense of secondary infrastructure.

A disaster could be anything from a cyber attack to theft or failure of equipment to natural disasters such as fire and floods – without a business continuity plan in place, these scenarios could all lead to weeks or months of downtime, a crippling blow to any organisation.

We will help you put together a plan that protects your business-critical systems, whether you are on public, private or hybrid cloud, incorporating off-site hyper-v replication, VMware replication or individual server replication in a hot standby scenario.

Our commitment to you

- Direct telephone and email access to our UK based support team.
- Our infrastructure is monitored and maintained on a 24-7-365 basis.
- Our network is designed to be resilient, highly available and self-healing.
- All our operations conform to ISO 9001 standards.
- All our data centres are UK based and conform to ISO 27001 standards with the option for environments that support PCI-DSS compliance.

Features & benefits

- **Business continuity**
Ensure your business has everything it needs to continue operating whatever happens.
- **Encrypted backups**
Our cloud backups are encrypted and stored in geographically-diverse data centres.
- **Hot disaster recovery site**
We can replicate your systems into a hot standby scenario to get your business operating again at short notice.
- **Work anywhere**
Our secure email and remote desktop solutions enable you to work from any device, anywhere in the world.
- **VoIP phone systems**
Take your phone systems anywhere, easily set up call diversions or use the included softphone through a laptop if you lose the handset.
- **Ultra secure data centres**
Our data centres are ultra secure and conform to ISO27001 standards.
- **Heroic support**
Complete support wrapper from our experienced UK based team of engineers.
