

# Business communications

## A complete solution for your comms

Your business relies on a good communications system, so we built a complete package that includes VOIP telephone with optional handsets, superfast broadband, phone line and mobile SIM. That's everything you need from one supplier with a short contract term and plenty of flexibility to suit any business of any size, from startups and one-man-bands to multi-site businesses.

Based on our reliable Voice over IP (VOIP) telephone system, this package offers a complete communications solution for your business that's scalable and cost-effective with only a minimal capital outlay. VOIP can also help ensure business continuity. If anything should happen to your premises, simply take your phone system anywhere with an Internet connection and plug it in with minimal configuration needed.

### Features & benefits

- Full service and support**  
We will handle provisioning, migration and number porting.
- Scalable systems**  
Suitable for any business, from home-workers to the enterprise, and can grow with you.
- Cost effective**  
Low cost calls, highly competitive rates and only one supplier. This is a streamlined end-to-end single solution from handsets to billing.
- Options available**  
Choose between telephone handset(s) or a soft client. VOIP requires a broadband connection which is included, but you can choose to use an existing supplier instead.
- Flexible contracts**  
Our solutions range from short 30 day contracts to 36 months, depending on hardware requirements.
